

Appl. No. 10/735,549
Amdt. dated January 25, 2006
Reply to Office action of October 26, 2005

Amendments to the Specification:

Please replace the Abstract with the following amended Abstract:

ABSTRACT

~~In at least some embodiments, a~~ A system may comprise is provided that
includes a CPU, a graphical user interface coupled to the CPU, and a memory
coupled to the CPU. The memory stores a bump map application and a data
extraction application executed by the CPU, ~~wherein the~~ The bump map
application displays a plurality of editable textual character groups representative
of a plurality of bumps. The textual character groups ~~that are arranged on the~~
graphical user interface according to a relative coordinate position of the bumps
with respect to an origin. ~~In some embodiments, the~~ The data extraction
application automatically extracts data from the bump map application for use by
a router application.
